RunPod Proof of Use

EVIDENCE PENDING

No RunPod configuration, endpoint, or authentic account evidence was found in the repository audit. Team confirmation is required.

Replace this page with authentic, unaltered evidence before submission.

Evidence to add
• RunPod pod or endpoint page showing the project and account/team context.
• Relevant deployment or inference view and the actual endpoint URL, if used.
• If RunPod was not used, confirm whether the organizer accepts a short “not used” declaration instead of proof.

This placeholder is not evidence that the team used or deployed the platform.
